

« Extreme sophistication »

“**Extatic**”, the new **Balmain** fragrance line combines boldness and elegance. The cap and collar, produced by **Qualipac** plays on a contrast of materials and finishes: gold and black for women fragrance, white bronze and black for men's perfume.

The top and base of the cap are electro-plated. They are connected by a piece in black resin, an element that is both attractive and functional. The assembly is done by clipping.

The side stripes, made in the mold, as the contrast between the smooth shoulder, slightly rounded, of the collar and the angular appearance of the cap, evoke Balmain's fashion style.

Another detail highlights Extatic's extreme sophistication: the tube diver, adorned with a black vertical sheath that echoes the horizontal black line in the center of the cap.
